

Properties and indications:

Meso-K + Arnica is a serum for topical use, made from Pro-Vitamin K, proteoglycans, Arnica extract, vitamins F and C. Applied directly to the skin before and after aesthetic and/or cosmetic care, it prevents and improves skin complexion, re-establishes elasticity and helps epidermis to regenerate.

Main active:

Proteoglycans (mucopolysaccharides): Are macromolecules which help stimulate the dermal metabolism and fill all dermis spaces not occupied by cells and fibres.

Pro-Vitamin K: Together with the proteoglycans, it helps to regulate dermis regeneration, improving cutaneous micro-circulation.

Arnica extract: well known in phytotherapy for its many properties, it refreshes and relaxes skin subjected to stress, cosmetic and/or aesthetic treatments.

Vitamin F: Participates as a nutritional element for skin cells.

Vitamin C: Improves skin aspect, accentuating its luminosity.

Globally, Meso-K + Arnica improves the appearance of the skin and re-establishes its plasticity and elasticity after cosmetic and/or aesthetic cares.

Instructions for use:

Shake well the bottle before using Meso-K + Arnica for evenly dispersing the high concentrated active molecules in the serum. Apply Meso-K + Arnica once or twice a day with a soft massage. Better results could be achieved by applying

Meso K + Arnica one week before the cosmetic and/or aesthetic special care.

Presentation:

30 ml vial dropper
1,056 FL.oz.
